Node.js | SQL | Javascript | HTML | CSS | Python | JSON

PROJECTS

Use My Tech Stuff - Backend

<https://usemytechstuff-app.herokuapp.com/>

- Delivered a Restful API using Node, Express, and SQL that allows users to register, signup, and perform CRUD operations as owners and renters.
- Implemented JSON Web Token authentication for security and added restricted middleware to prevent access to unauthorized endpoints.

Weather App - Backend

<https://altre-weather-app.herokuapp.com/>

- Developed a web server to display the weather from anywhere using Node and Express.
- It retrieves data from mapbox.com and weatherstock.com API's.

Story Book App - Backend

<http://story-book-ca.herokuapp.com/>

- Full application build that uses Node, Express, and MongoDB.
- Users can login in using the Google OAuth Strategy from Passport, and perform CRUD operations by creating either public or private stories saving to the users dashboard.
- Users can view other users public stories from the /stories endpoint.
- Server side rendering was possible using handlebars.

React Redux Shopping Cart - Front & Backend

<http://story-book-ca.herokuapp.com/>

- Front end developed using React class components. Styled with CSS and animated using the React-Reveal library.
- Backend developed using Node and MongoDB. Users can perform CRUD operations by adding and deleting products to their shopping cart.

Todo App - Frontend

<https://todoappca.netlify.app/>

- For the React Todo project I was able to explore and utilize the reducer pattern.
- I gained an understanding of what immutability is, reducers, actions, dispatch, and how to use the reducer hook.

EXPERIENCE

Financial Aid Administrator

Full Sail University

July 2018 - February 2020 Winter Park, FL
